PMS MONITOR · EU MDR ART. 83–86, FDA 21 CFR 803 & ANIMAL-HEALTH PV

Automated MAUDE & ClinicalTrials.gov PSUR Framework

Prepared by: Kaled Bouchagraoui
Deliverables: Word PSUR Draft + 4-Sheet Excel + 300-DPI Brief

This 1-page note describes how public FDA MAUDE adverse events, 510(k) predicate clearances, FDA recalls, and ClinicalTrials.gov REST API v2 feeds are queried and reconciled for medical-device, SaMD/HealthTech, dermo-cosmetic, and veterinary Periodic Safety Update Reports under EU MDR 2017/745 and MDCG 2022-21.

01 · OpenFDA MAUDE

Queries public device/event.json and event_type/product_problems facets to stratify Malfunction, Injury, and Death counts.

02 · 510(k) & Recalls

Extracts recent FDA 510(k) clearances and Class I/II recall notices linked to predicate product codes.

03 · ClinicalTrials v2

Pulls recruiting, active, and completed PMCF, SaMD, or competitor trials with sponsor, enrollment, and primary endpoint summaries.

04 · PSUR Packaging

Compiles a landscape Word report, 4-sheet Excel workbook with clickable NCT URLs, 300-DPI dashboard, and ZIP archive.

SURVEILLANCE PIPELINE & REGULATORY ARTIFACT MAPPING

MAUDE Event & Problem Mode Stratification	Separates Malfunction, Injury, and Death volumes and ranks top product_problems percentages for EU MDR PSUR safety signal review.
510(k) Predicate & Recall Tracking	Tabulates applicant clearances, k-numbers, product codes, and FDA safety notices in filterable Excel sheets for state-of-the-art benchmarking.
PMCF & Competitor Clinical Trial Radar	Maps ClinicalTrials.gov NCT identifiers, study phases, enrollment targets, and primary outcomes with direct registry hyperlinks.
ALCOA+ Reproducible Audit Packaging	Retains exact search windows, API query parameters, and regulatory QA disclaimers inside the Word brief and Excel README tab.

Standard Deliverable & QA Scope: Engagements cover live multi-query extraction for device families, SaMD/digital-health tools, aesthetic lasers, or veterinary products, yielding a print-ready Word PSUR draft, 4-sheet filterable Excel workbook, high-DPI chart exports, and documented query snapshots for notified-body or GVP audits.

OpenFDA (CC0) & ClinicalTrials.gov v2 · Technical PSUR draft only (PRRC/RA sign-off required; liability capped at fees paid)
